

Day 11 - Hashing, Encryption, JSON Web Tokens , Local storage

1. Hashing is one way
2. Encryption is two way.
3. jwt - signin and verify
4. Databases - in memory objects are a big no!

Databases

In the real world, a basic architecture looks like this

There are various types of databases

1. Graph DBs
2. Vector DBs
3. SQL DBs
4. NoSql DBs

For todays class, we'll look at a famous NoSQL database - MongoDB
